**Subject:** RE: PPH Discussion Group

MATRIC has completed a second analysis of the PPH tank and has confirmed our earlier analysis of the ratio PPH to DiPPH

We believe the PPH tank contains a mixture of 6 : 94 PPH to DiPPH.

The ratio is consistent with the ratio we found for the MCHM tank. We believe the ratio of PPH to DiPPH is approximately 6 : 94 in the MCHM tank.

Best Regards
